

Hornby Island Fire Hall Update July 2018

Fire Hall

With the fire hall project now completed, and the fire department fully operating from the new hall, Comox Valley Regional District (CVRD) staff have developed a project close-out report. This report is available at comoxvalleyrd.ca/hornbyislandfirehall

The purpose of this report is to provide the Hornby Island community with an overview of the fire hall project including a timeline and financial review and to reflect on the challenges overcome by the team and the lessons that were learned.

Superior Tanker Shuttle Accreditation (STSA)

Since the delivery of the new tanker truck in September, Hornby Island Fire Rescue (HIFR) has been training to challenge the STSA. Considering the unseasonably dry conditions and how busy the island is right now, it was decided to postpone the test until fall. HIFR successfully satisfied the conditions of the test in a practice run and the fire chief is confident that the HIFR team will be able to achieve their accreditation later in 2018.

The CVRD wishes to thank the Hornby Island community and the volunteers for your patience and understanding as we worked to make this project a success.
